This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Original) A cash control system for a business establishment having one or more cash registers, the cash control system comprising:

a safe assembly including a safe for securing cash and a currency reader coupled to the safe for determining the amount of cash received in the safe;

a central control unit configured to receive deposit information from the safe assembly and to generate and transmit deposit reports and transmit identifiers that distinguish deposit information accumulated during an accounting period before a predetermined event and deposit information accumulated during the accounting period after the predetermined event; and

a cash information server configured to receive the deposit information and identifiers from the central control unit and to identify the amount of cash collected by the business establishment during the accounting period.

2. (Original) The cash control system of claim 1 further comprising a printer with a bar code generator coupled to the central control unit.

3. (Original) The cash control system of claim 1 further comprising a MICR line reader coupled to the central control unit to read MICR line information, the central control unit configured to transmit the MICR line information to the cash information server.

4. (Original) The cash control system of claim 1 further comprising at least one additional safe assembly including a safe for securing cash and a currency reader coupled to the safe for determining the amount of cash received in the safe and wherein the central control unit is configured to receive deposit information from the additional safe assembly and transmit deposit reports to the cash information server containing deposit information received from the additional safe assembly.

5. (Original) The cash control system of claim 1 wherein the safe is associated with a unique number which is included in the deposit reports transmitted by the central control unit.

6. (Original) The cash control system of claim 5 wherein the central control unit is configured to identify when the safe is opened and the cash stored in the safe is removed.

7. (Original) The cash control system of claim 6 wherein the identifiers are a sequence number and an alternate sequence number, wherein the central control unit is configured to adjust the sequence number and the alternate sequence number based on cash being removed from the safe.

8. (Original) The cash control system of claim 7 wherein the accounting period is a business day as identified by a store manager.

9. (Original) The cash control system of claim 8, wherein the predetermined event is the opening of the safe and the cash stored in the safe removed and wherein the central control unit is configured to change one of the sequence number and the alternate sequence number at the time cash is removed from the safe and to change the other of the sequence number and the alternate sequence number at the end of the business day.

10. (Original) The cash control system of claim 9 wherein the central control unit is configured to transmit a first deposit report that identifies deposit information for the business day up to the time of removal of cash from the safe and wherein the sequence number and alternate sequence number are different on the first deposit report and wherein the central control unit is configured to transmit a second deposit report that identifies deposit information for the business day starting from removal of cash from the safe and wherein the sequence number and the alternate sequence number are the same on the second deposit report.

11. (Currently Amended) A method of monitoring cash deposited and removed at a business establishment having one or more cash registers and using a cash control system, the method comprising:

determining deposit information using a currency reader based on cash collected at a business establishment during an accounting period;

generating unique identifiers based on the accounting period and the cash deposit;

adjusting the unique identifiers when the cash deposited has been removed;

transmitting the deposit information and the unique identifiers to an off-site location; and

receiving the deposit information and the unique identifiers at the off-site location to distinguish an amount of cash collected by a business establishment during the accounting period and an amount of cash retrieved from the business establishment.

12. (Original) The method of claim 11 wherein the unique identifiers are a sequence number and an alternative sequence number.

13. (Original) The method of claim 12 wherein the accounting period is a business day as identified by a store manager.

14. (Currently Amended) A method of monitoring cash deposited and removed at a business establishment having one or more cash registers and using a cash control system, the method comprising:

collecting cash at a cashier station through sales transactions;

securing some of the cash from sales transactions into the cash control system;

determining deposit information using a currency reader based on the cash secured;

transmitting the deposit information to an off site location;
